

The care guide to a

SUSTAINABLE COSTUME

One of the best ways to reduce the environmental footprint of a piece of clothing is to extend its lifespan... and that starts with gentle and ecological care!

Maintenance has a big impact on energy, water and chemicals used. It is therefore important to adopt new daily habits.

Make your loads go further by filling your laundry machine well

Wash using cold water

Avoid using the dryer, iron and steamer

Cleaning products

Use environmentally-friendly cleaning products.

- **Éco-Strips** : biodegradable, ultra-concentrated, zero waste packaging, hypoallergenic, paraben-free, 1 to 2 strips per load.
Ex : Tru Earth*
- **Concentrated** : requires smaller amounts. Favour biodegradable and hypoallergenic brands.
Ex: Unscented Company*, Pure*, Attitude*
- **Baking soda**: two tablespoons in the washing machine helps eliminate odors.
- **Sodium Percarbonate**: non-toxic alternative for removing stains from white clothes.

Dry cleaning

Hand wash if possible. Avoid dry cleaning or opt for eco-friendly dry cleaning.

Traditional cleaners use perchlorethylene, a product belonging to the family of volatile organic compounds (VOCs), linked to several health problems.¹

Look for green cleaners that use a water cleaning system.

- Nettoyeur Écologique Royal
- Pressing Aquanet
- Daoust Ecoefficient Cleaners

Recognize the dry cleaning symbols so as not to send clothes unnecessarily!

Tips and tricks for the clever dresser

Most of the products below can be found in bulk stores

Make your own disinfectant spray with vodka and water

Basic recipe

1/3 Vodka

2/3 water

Optional: add a few drops of tea tree essential oil with antibacterial properties. See the Les Trappeuses manifesto.²

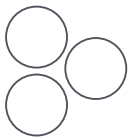

Block microfibres

It is estimated that 500,000 tons of plastic microfibers are released each year during washing and end up in our waterways⁴

There is no miracle solution to block all microfibers, so favoring natural fibers is the best way to avoid them.

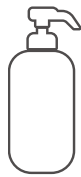

There are, however, a few options that block out some of the microfibers.

- Laundry bag
Ex: Guppyfriend
- Anti-microfibre washing ball
Ex: CoraBall
- Filter
Ex: Microfiber Filter from Girlfriend and Lint LUV-R

Use wool dryer balls

Reduces drying time by 10 to 25%

Use organic liniment to clean and moisturize muddy leather boots

Yes, the same as you'd use for babies' bottoms!

Washing

Ironing

Know the symbols for clothing care⁵
